Parts and Repairs

Parts Catalogs On RIDGID Work Saver Tools Or Machines Furnished On Request:

These manuals illustrating parts for Hand Tools and Machines are available on request. Use these Parts Manuals, which cover all tools listed in this catalog, for ordering the exact parts wanted. Be sure and give model number and size of tool for which the part is being ordered, as well as any other data that will help us avoid error in filling the order. Estimates on repairs and prices on repair parts will be gladly furnished upon receipt of tool at our factory. Return all tools by prepaid transportation.

Machinists' and Woodworkers' Vise Catalog; RIDGID / Supreme Drill Chuck and Power Tool Equipment Catalog; Direct Mail Stuffers.

RIDGID Straight Pipe Wrenches

Ten Sizes, 6" through 60"

These, the world's most popular pipe wrenches, are known for the brutal punishment they can take because of their extra, built-in toughness. Before shipment every wrench is work tested. Housings are guaranteed not to break or warp. Replaceable jaws are made of hardened tool steel. Full-floating hook jaw assures instant grip... easy release. Patented spring suspension eliminates chance that jaws could jam or lock on pipe. Handy pipe scale and large, easy-to-spin adjusting nut give fast, one-hand setting to pipe size. Comfort-grip, malleable iron 1-beam handle has convenient hang-up hole.

RIDGID Aluminum Handle Straight Pipe Wrenches

Six Sizes, 10" through 48"

Aluminum handles make these new RIDGID heavy-duty straight pipe wrenches almost 40% lighter than similar wrenches with malleable iron handles. Housings are guaranteed not to break or warp. Jaws and other parts are identical to those of other RIDGID pipe wrenches described on this page... offer the same durability and ease of use.

RIDGID End Pipe Wrenches

Eight Sizes, E-6" through E-36"

Designed with an offset jaw, these RIDGID End-Pattern Wrenches assure a faster, easier-to-get grip and a longer handle swing when used for pipe work close to a wall, in tight quarters or on closely spaced parallel lines. You'll get all the regular quality features, including guaranteed housings, that have made the RIDGID Straight Pipe Wrenches famous, the first choice of pipe pros all over the world.

RIDGID Raprench

10" Size Only

This RIDGID Raprench has a special hook jaw housing that is deeper and broader to create a smooth, flat surface. This broad surface plus added head weight makes the Raprench ideal for occasional hammering use. As a wrench, it offers all the same outstanding qualities found in all RIDGID Heavy-Duty Wrenches.

RIDGID Straight & End Pipe Wrenches

| Straight | End | Capacity | Wt. lbs. each | Wt. lbs. 6 to Box | Aluminum Handle Straight (See column at left for capacities) | | |

Nut

RIDGID Aluminum Handle Offset Pipe Wrenches

Three Sizes: 14", 18" and 24"

Featuring a jaw opening parallel to lightweight aluminum handle, these wrenches are almost 50% lighter, but just as strong as regular RIDGID Wrenches of the same size. Housing is guaranteed not to break or warp. Hook jaw head is narrower to give easy entry into tight spots. Combination of light aluminum handle and forward facing jaw makes overhead or tight quarter work fast and easy. Adjusting nut turns easily for fast size adjustment. Jaws are made of strong, alloy tool steel, then hardened.

| Wrench Size | Capacity | Wt. lbs. each | Wt. lbs. 6 to Box |
|-------------|---------------------|---------------|-------------------|
| 14" | 1/8" through 2" | 1 1/4 | 12 1/4 |
| 18" | 1/4" through 2 1/2" | 3 1/2 | 22 1/2 |
| 24" | 1/4" through 3" | 5 3/4 | 37 1/4 |

RIDGID Heavy-Duty Chain Wrenches

The unique design of these rugged wrenches makes it easy to work in extra close quarters. Fast ratchet-like action lets you work from either side. Hardened tool steel jaws are replaceable.

Tempered steel chain is held securely in double lock grips for extra dependability. The C-18 features extra heavy chain. Comfort-grip handle has handy hang-up hole. Chain wrenches are traditionally rated by handle length but knowledgeable users appreciate the actual 5" pipe capacity.

| Wrench | Rated Capacity | Actual Capacity | Chain Length | Wt. Lbs. Each |
|----------|----------------|-----------------|--------------|---------------|
| No. C-14 | 2" | 5" | 189 15/16" | 2 3/4 |
| No. C-18 | 2 1/2" | 5" | 20 1/4" | 6 |

RIDGID Light-Duty Chain Wrench

Here's an extra-handy, lightweight utility chain wrench. Double-jaw gives fast, ratchet-like action in either direction. Flexible chain slips through tightest quarters. You get a tight grip on all shapes without crushing. Locking and releasing are quick and easy with handy grab ring. One-piece forged alloy steel handle and jaw are nickel-chrome plated. This tool has an actual capacity equal to other chain wrenches with similar chain length.

| Wrench | Rated Capacity | Actual Capacity | Chain Length | Wt. Lbs. Each |
|----------|----------------|-----------------|--------------|---------------|
| No. C-12 | 2" | 4" | 15 3/4" | 1 3/4 |

RIDGID Strap Wrenches

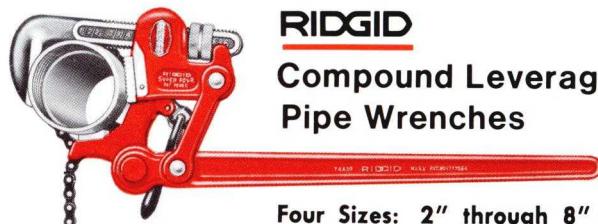

Three Sizes: 1/8" through 5"

These are ideal wrenches when you're working with any polished pipe. Sturdy, woven nylon strap gives you a tight grip but will not mar the finish. Strap adjustment is fast and easy. Head and I-beam handle are one solid piece. Strap easily replaced.

| Wrench | Strap Width | Capacity | Wt. lbs. Each |
|--------|-------------|-----------------|---------------|
| No. 1 | 1/2" | 1/8" through 2" | 1 1/4 |
| No. 2 | 1 1/8" | 1/8" through 2" | 1 3/4 |
| No. 5 | 1 3/4" | 1" through 5" | 2 |

Replacement Straps:

No. 1 Width and Length 1/2" x 17"
 No. 2 Width and Length 1 1/8" x 17" —extra length 30"
 No. 5 Width and Length 1 3/4" x 29 1/4" —extra length 48"
 Extra length straps without loop on request.

RIDGID Compound Leverage Pipe Wrenches

TYPE RIDGID MAXI LEVERAGE

Four Sizes: 2" through 8"

Here's a wrench that lets one man do the work of two. Short handle makes it easy to get at frozen joints even in tight quarters. Leverage is doubled as hook jaw turns pipe one way, while offset chain trunnion exerts pressure the opposite way. Correct placement of trunnion lets you tighten or loosen right or left hand threaded joints . . . with pipe on either side of fitting. Replaceable jaws are hardened alloy tool steel.

| Wrench | Capacity | Wt. lbs. each | Wrench | Capacity | Wt. lbs. each |
|----------|----------|---------------|----------|----------|---------------|
| No. S-2 | 2" | 7 1/4 | No. S-6A | 6" | 45 1/2 |
| No. S-4A | 5" | 33 1/2 | No. S-8A | 8" | 68 1/2 |

RIDGID Improved Stillson

Pipe Wrenches

Eight Sizes: 6" through 48"

If you prefer a Stillson Wrench, here is the finest made. Handle and full-floating hook jaw are made of special heat-treated steel. Handy pipe scale on hook jaw speeds size setting. Located in the frame, cone-coil safety spring for hook jaw replaces exposed flat spring. Handle has hang-up hole.

| Wrench Size | Capacity | Wt. lbs. each | Wt. lbs. 6 to Box | Wrench Size | Capacity | Wt. lbs. each | Wt. lbs. 6 to Box |
|-------------|----------|---------------|-------------------|-------------|----------|---------------|-------------------|

| 14" | 1 1/2" | 2 3/4 | 17 1/4 | 48" | 6" | 23 1/4 | |

RIDGID Basin Wrenches

NEW ITEM

A) RIDGID No. 1010 Basin Wrench Has Solid 10" Shank
 B) RIDGID No. 1017 Basin Wrench Has Telescopic Shank for 4 Lengths from 10" through 17".

Forged alloy jaws are spring loaded to grip up to $\frac{3}{4}$ " nuts, $\frac{1}{8}$ " through 1" pipe and $\frac{3}{8}$ " through $1\frac{5}{16}$ " tube. You get fast, one-hand, ratcheting operation in tight spots. Tension plug holds head in any position up to 90° angle. Handle and shank are chrome plated. Stainless steel spring assures firm grip after positioning jaw on nut, pipe or tube. Telescopic shank on No. 1017 is quickly adjusted to desired length and held there by spring loaded pin.

| No. | Length | Capacity | Wt. Lbs. Each |
|------|---------|---|----------------|
| 1010 | 10" | Up through $\frac{3}{4}$ " Nuts | $1\frac{3}{4}$ |
| 1017 | 10"-17" | $\frac{1}{8}$ " through 1" Pipe $\frac{3}{8}$ " through $1\frac{5}{16}$ " Tube | 2 |

RIDGID Adjustable Wrenches

Eight Sizes: 4" through 24"

These adjustable wrenches are made of special alloy steel, then selective induction hardened for extra toughness and long service life. Thin head design speeds work in close quarters. Chrome plated finish stays bright and new looking for years. Design allows fast, easy, one-hand adjustment. When properly tightened on nut, jaw will not slip. Comfort-grip, I-beam handle has handy hang-up hole.

| Wrench Number | Size | Capacity | Wt. Lbs. Each |
|---------------|-------|----------|----------------|
| Chrome | Black | | |
| 704 | 904 | 4" | $\frac{1}{8}$ |
| 706 | 906 | 6" | $\frac{1}{4}$ |
| 708 | 908 | 8" | $\frac{1}{2}$ |
| 710 | 910 | 10" | $\frac{3}{4}$ |
| 712 | 912 | 12" | $1\frac{1}{2}$ |
| 715 | 915 | 15" | $3\frac{1}{4}$ |
| 718 | 918 | 18" | $5\frac{1}{8}$ |
| 724 | ... | 24" | $9\frac{1}{4}$ |

RIDGID Straight and End Hex Wrenches

Straight:
Six Sizes: $\frac{3}{16}$ " through 3"
Nut Capacity

End:
Three Sizes: $\frac{3}{8}$ " through 2"
Nut Capacity

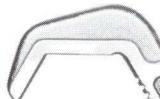

Hex jaw design gives multi-sided, non-slip grip on all hex and square nuts, unions, valve packing nuts and even flathead gas cocks. Smooth jaws won't mar plated finish. Offset jaw of end wrench is ideal for work close to walls or in tight quarters. Guaranteed housing.

Straight Hex Wrenches

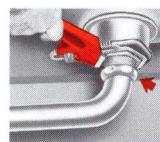

| No. | Nut Capacity | Max Jaw Opening Across Flats | Wt. lbs. Each | Wt. lbs. 6 to Box |
|-----|--|------------------------------|----------------|-------------------|
| 9 | $\frac{3}{16}$ " through $\frac{5}{8}$ " | $1\frac{1}{16}$ " | $\frac{3}{4}$ | $4\frac{1}{2}$ |

**RIDGID No. E-110 Offset Hex Wrench**

Handles Up Through
 $1\frac{1}{2}$ " Drain Nuts

Extra-wide-opening offset jaw gives easy-on, nonslip grip on sink and tub drain nuts... all other hard-to-get-at nuts and fittings. Thin, smooth jaws slip into tightest places... won't scratch chrome finish. Short handle makes work easy in close quarters. Multi-sided grip allows extra leverage... no more bruised knuckles.

| No. | Nut Capacity | Max Jaw Opening Across Flats | Wt. lbs. Each | Wt. lbs. 6 to Box |
|-------|-------------------------------------|------------------------------|----------------|-------------------|
| E-110 | Up thru $1\frac{1}{2}$ " Drain Nuts | $2\frac{5}{8}$ " | $1\frac{1}{2}$ | 10 |

RIDGID Spud Wrench, 12"

Here's a handy utility monkey wrench with rugged construction. Narrow jaws fit into tight quarters. Hook jaw is drop forged, then heat treated. Wt. $2\frac{1}{2}$ lbs.

RIDGID Exposed Ratchet**Drop Head Threaders**

No. OO-R: $\frac{1}{8}$ " through 1" No. 111-R: $\frac{1}{8}$ " through 1 $\frac{1}{4}$ "
No. 12-R: $\frac{1}{8}$ " through 2"

Here's the most economical answer to your low volume threading needs. Die heads lock into ratchet and handle assembly . . . can't fall out. Heads are easily removed when reversible ratchet knob is pulled out. Dies can be removed from head and reversed for close-to-wall threading. Handy carrier that holds all heads and handle assembly together is free with all sets except No. 12-R. *NPSM straight thread dies are available. See "Note" at bottom of page.

No. OO-R

Wire carrier not available for 12-R sets

*NOTE: Unless otherwise specified standard tapered pipe dies will be furnished for conduit. Conduit thread has the same standard specifications as tapered pipe thread. Such dies are marked NPT (American National Tapered Pipe Thread).

When straight conduit threads are required, specify dies for Straight Pipe Threads. Dies are marked NPSM (American National Straight Threads for Mechanical Joints).

RIDGID Enclosed Ratchet**Drop Head Threaders**

No. O-R: $\frac{1}{8}$ " through 1" No. 11-R: $\frac{1}{8}$ " through 1 $\frac{1}{4}$ "

Enclosed ratchet design keeps chips out . . . gives these threaders extra-smooth and easy action. Arrow on ratchet knob indicates direction of reversible ratchet. Die heads snap in from either side and push out easily for fast changing . . . can't fall out. Dies can be reversed in heads for close-to-wall threading. Wire carrier is free with both sets. *NPSM straight thread dies are available. See "Note" at bottom of left hand column.

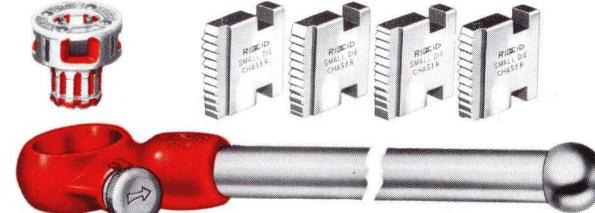

No. O-R

Die Heads Complete With Dies, Drop Head Threader Dies and Ratchet and Handle Complete.

Please see RIDGID Price List for complete selection of alloy, high speed and special dies for Stainless Steel, RH or LH, Die Heads complete . . . Ratchet and Handles complete. Dies used in RIDGID Drop Head and 3-Way Threaders are interchangeable size for size.

Alloy Pipe Dies for copper or brass. (Specify red or yellow brass).

Combinations not listed above are available, but not packaged in sets.

For Replacement Parts See RIDGID Hand Tool Parts Catalog

RIDGID Thread Cutting Oil — See Page 21

RIDGID OO-RB Bolt Threaders

Die heads lock in quickly, won't fall out. Easy adjustment for oversize and undersize thread. Button dies easily changed or reversed to thread close to bolt shoulder or head. Dies of special tool steel, precision cut. Die Heads fit RIDGID OO-R Ratchet and Handle only. National Coarse or Fine threads. Left Hand Dies available.

OO-RB Threader

Wt. lbs.

Complete $\frac{1}{4}$ " through 1" with 16th sizes
(10 heads with Ratchet and Handle). Right Hand 20

OO-RB Threader

Complete $\frac{1}{4}$ " through 1" less 16th sizes
(7 heads with Ratchet and Handle). Right Hand 16

RIDGID OO-R Ratchet and Handle Complete
(Takes OO-RB Heads)

RIDGID 3-Way Pipe Threaders

Two Sizes: For $\frac{3}{8}$ " through 1" Pipe and Conduit

These sturdy threaders are instantly ready to cut any of 3 popular sizes of threads. Each die set is locked in place . . . can't get lost. Dies can be reversed for close-to-wall threading. Guide keeps threader straight for true threads every time. Two handles make threading easier. Specify pipe, conduit, or straight NPSM dies.

| Sizes | Wt. lbs. |

**RIDGID****No. 65R-TC
Jam-Proof
Ratchet Threader****With True-Centering
Workholder**

New foolproof True-Centering Workholder — sets instantly, flip of lever tightens all three jaws together — true threads even on

over-or-under size pipe. Easy adjustment for drip threads. Threads 1", 1 1/4", 1 1/2" and 2" pipe with one set of High-Speed Dies — sets to correct size in 8 seconds. Jam-proof — kicks out automatically — no watching. Right hand only.

No. 65R-TC Threader, complete with

1 set of High Speed Dies..... 27

No. 65DR-TC Same as above with 2 handles..... 30

No. 65R-TC Threader, complete with
1 set of SD-123 Dies for J.M. Chemtite Pipe..... 27

Wt. lbs.

**RIDGID No. 65R-C****Jam-Proof
Ratchet Threader****With Cam-Type
Workholder**

Perfect threads, fast and easy on 1", 1 1/4", 1 1/2", 2" pipe, with 1 set of High Speed Dies that stay in threader. Jam-proof drive pawl

kicks out after thread is cut. Cam-type workholder sets to pipe size instantly; takes 2" couplings to thread 2" close nipples. Every 65R factory-tested. Threaded sample in each tool. Right hand only.

No. 65R-C Threader, complete with

1 set of High Speed Dies..... 25

No. 65DR-C Same as above with 2 handles..... 28

Geared Pipe Threaders

RIDGID No. 141

threads 2½", 3", 3½", & 4" Pipe and Conduit with one set of dies

RIDGID No. 161

threads 4", 4½", 5" & 6" Pipe and Conduit with one set of dies

Jam-proof for safe power or hand threading. Drive pinion kicks out automatically. Die head can't jam and cause costly repairs and delay. Just one set of High-Speed dies threads 4 sizes of pipe and conduit. No die sets to change or lose. Die size selector plate sets quickly and locks at desired size. Easy adjustment for tapered, straight, over or under size threads. Fast-action, cam-type workholder sets to size by quick turn of collar. Set screw holds work centered for true threads every time. Fully enclosed, safe, dirt-proof gear.

Note: Now shipped and priced less Ratchet and Handle.

RIDGID Nos. 1-A & 2-A**Heavy-Duty Pipe Cutters**

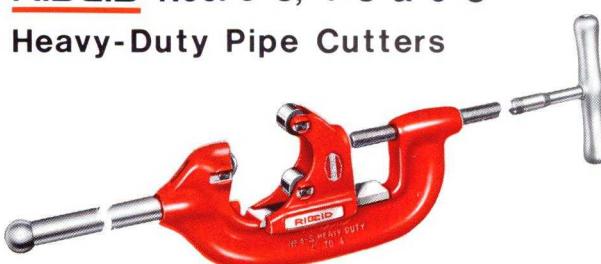

Fast, clean pipe cutting by hand or power. Extra long shank protects adjustment threads. Extra large handle for quick, easy adjustment. Perfectly balanced frame of special malleable iron, guaranteed not to break or warp. Equipped with tough blade cutter wheel. Can convert to 3-wheel cutter by replacing rollers with cutter wheels. Every cutter factory tested to insure perfect tracking.

| No. | Capacity | Wt. lbs. |

RIDGID Bolt Cutters

Center Cut, Six Sizes, $\frac{1}{4}$ " through $\frac{5}{8}$ " capacities

Designed with a 30% greater mechanical advantage, these cutters give quick, easy cuts of rod, wire mesh, concrete form ties, cable, steel strap, bolts, and metal brackets. Extra power greatly reduces effort required. All parts are heat treated for maximum strength and wear resistance. Rolling cam action gives greater efficiency. Jaws are made of forged tool steel. Slim head permits cutting close to surface. Rugged cover plates keep jaws in positive alignment. Single adjusting screw controls cutting edge contact. Special Cable Lock, which prevents cable from flattening, available for No. 24S (E-2131-X) and No. 36S (E-2133-X).

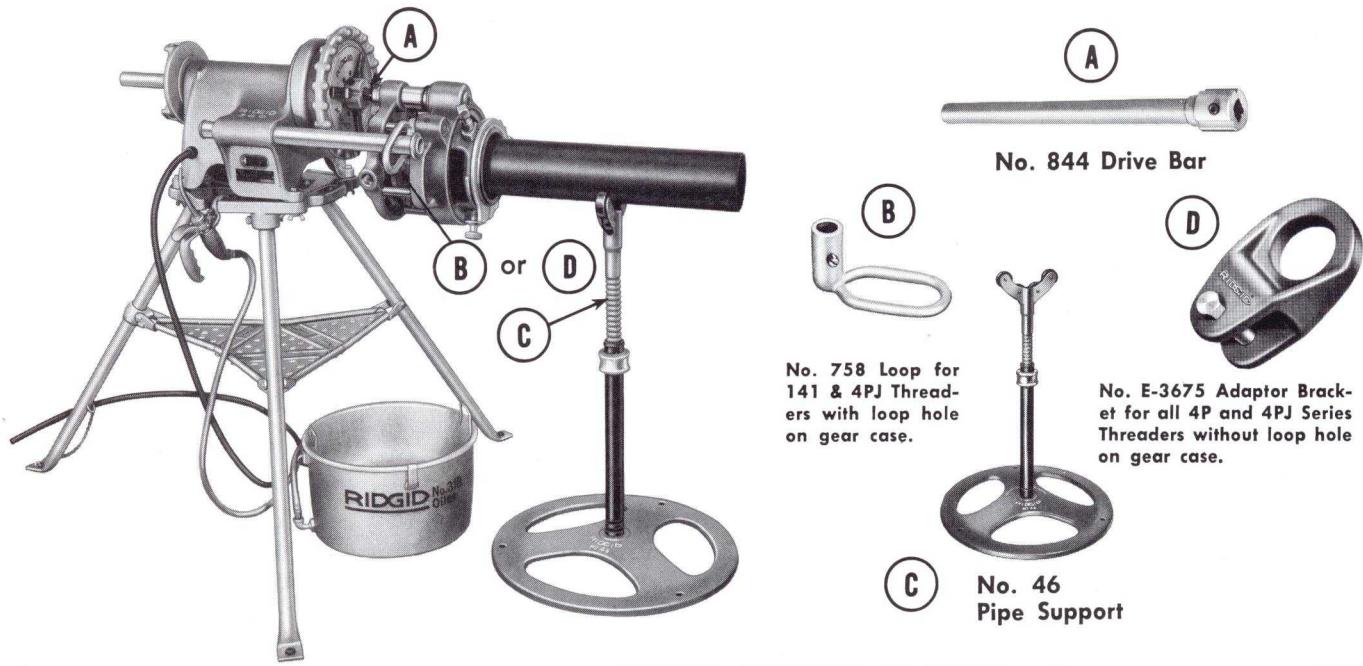

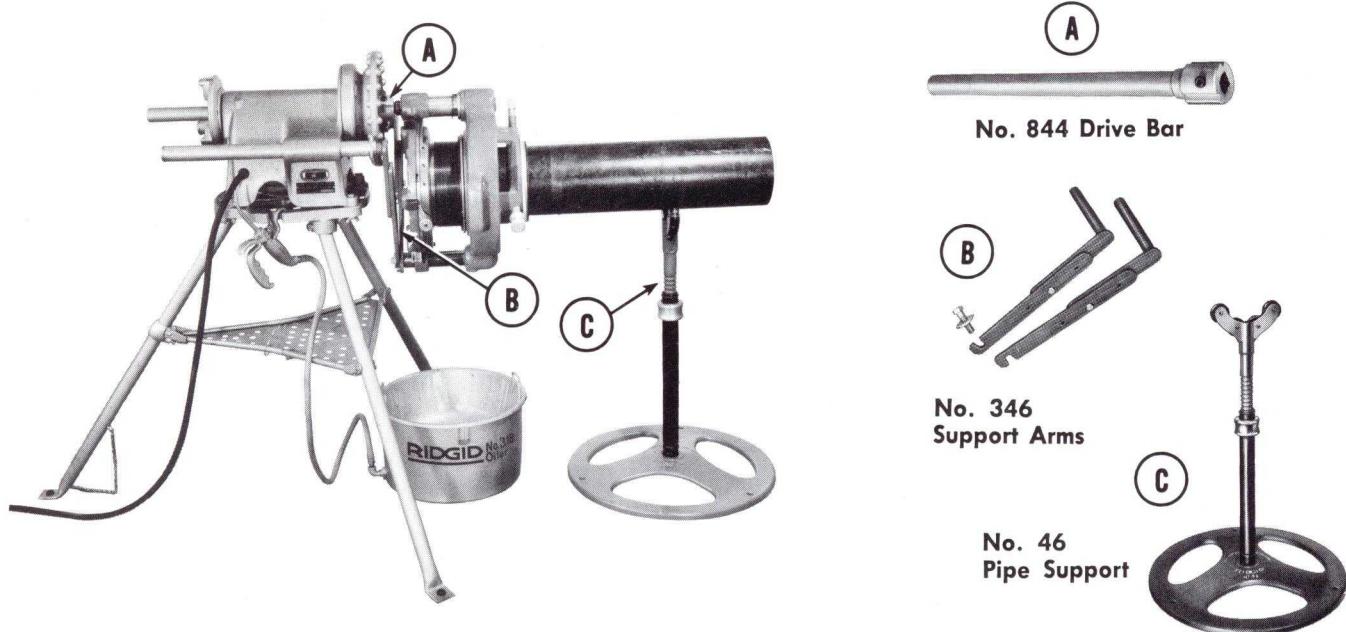

FIGURE 2 — With No. 161 Threader and 300, 400, 400A or 200 Power Drives, use equipment shown below.

RIDGID Thread Cutting Oil — See Page 21.

RIDGID 535 Pipe and Bolt Threading Machine

Capacity: $\frac{1}{8}$ " through 2" Pipe

$\frac{1}{4}$ " through 2" Bolts

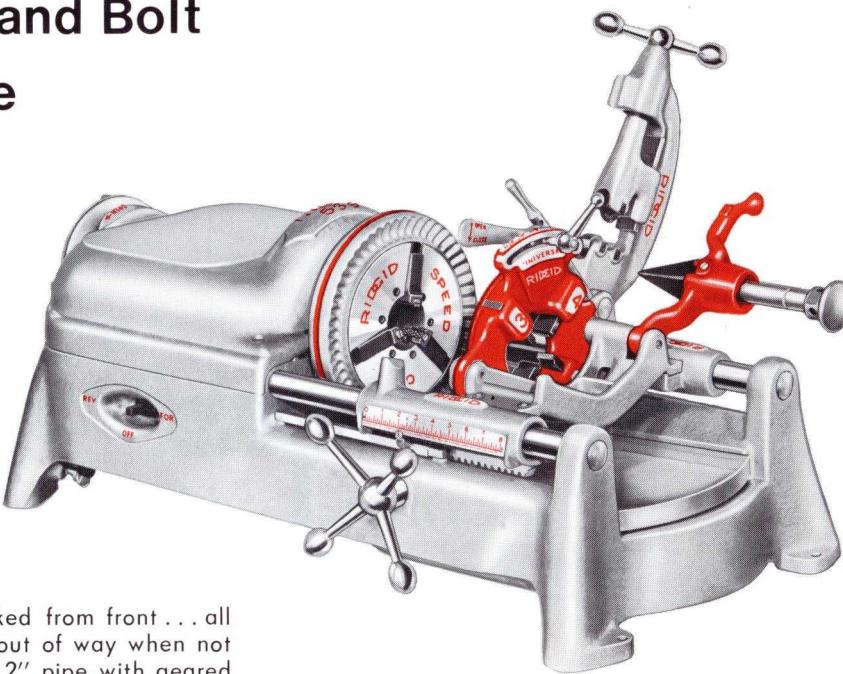

Compact Pipe Workshop:

Threads . . . Cuts . . .

Reams . . . Ready for Instant Use

All RIDGID Quick-Opening Pipe and Bolt Machine Die Heads and Dies Can Be Used

Work Saver Features: Pipe can be chucked from front . . . all tools operate independently, swing up out of way when not in use. Plenty of power to thread up to 12" pipe with geared threaders. Reversible vane-type pump recirculates thread cutting oil. Lathe-type adjusting handle moves carriage accurately, smoothly. Easy-to-read length gauge gives fast, exact cut-offs.

Standard Equipment:

(Does not include Die Heads and Dies)

| | |
|-------------------------------|---|
| Motor: | $\frac{1}{2}$ H.P. Single-Phase 115 volt Universal Motor, reversible at switch, large brushes, AC or DC, 25-60 cycles, 15-ft. oil resistant cord. 230 volt motor on request at no extra charge. |
| Switch: | Heavy-duty, bump-proof reversible switch. |
| Chuck: | RIDGID Patented — Speed Chuck with replaceable rocker-action insert jaws. |
| Rear Centering Device: | Cam-action, turns with Chuck. |
| Cutter: | Roll-type cut-off, self-centering full-floating. |
| Reamer: | Five-flute cone, $\frac{1}{8}$ " through 2". |
| Oil: | 3 Gallons of RIDGID Thread Cutting Oil. |
| Wrenches: | 4 Allen type. |
| Cutter Wheel: | 1 spare No. E-1032 Cutter Wheel. |
| Grease: | 1 tube Gear Grease. |

For Maximum Efficiency Be Sure to See These Popular RIDGID Pipe Machine Accessories

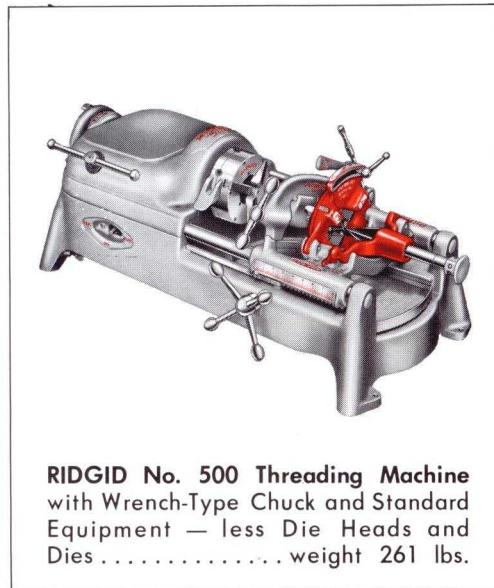

1. Pipe Dies for Quick-Opening Universal, No. 514, No. 515 or Mono Type Die Heads — (See Page 19)

3. Die Head Racks for easy die head selection — (See Page 20)
4. No. 19 Nipple Chuck for threading short nipples — (See Page 20)
5. Stands available, four models — (See Page 20)
6. Universal Drive Shaft for use with geared threaders — (See Page 21)
7. RIDGID Thread Cutting Oil — (See Page 21)

No. 535 Machine with Standard Equipment, $\frac{1}{2}$ " to 2" complete with 1 Universal Die Head . . . 1 set right hand Alloy Pipe Dies for $\frac{1}{2}$ " x $\frac{3}{4}$ " and 1 set of right hand Alloy Pipe Dies, 1" through 2".

Shipping Weight 279 lbs.

No. 535 Machine with Standard Equipment, Less All Die Heads and Dies.

Shipping Weight 265 lbs.

RIDGID No. 500 Threading Machine with Wrench-Type Chuck and Standard Equipment — less Die Heads and Dies . . . weight 261 lbs.

RIDGID Quick-Opening Die Heads and Dies for All Threading Machines and No. 311 Carriage

Note: For Conduit Use N.P.T. Dies. For Straight Threads, Specify N.P.S.M. Dies.

All RIDGID quick-opening die heads slip quickly into carriage, are easy to remove. Full width dies that give positive threading accuracy . . . can be changed in seconds. All dies have been factory tested for guaranteed accuracy. Threads can be run right up to chuck. Fast, easy size adjustment, even for over or under size threads, can be made right on machine. Sizes are clearly stamped on size bar. When desired length of thread is cut, flip of release lever retracts dies . . . no slow back-off.

Universal Die Head and Dies for Pipe and Bolts

Fully Adjustable — Capacity: Pipe $\frac{1}{8}$ " through 2"; Bolts $\frac{1}{4}$ " through 2"

Universal Q.O. Die Head only
(less Dies) Right Hand, wt. $12\frac{1}{4}$ lbs.
Left Hand Head for Pipe Dies only,
wt. $12\frac{1}{4}$ lbs.

Dies For Universal Die Head Only:

Universal Right Hand Pipe Dies: Universal Left Hand Pipe Dies:
($\frac{1}{8}$ "), ($\frac{1}{4}$ " x $\frac{3}{8}$ "), ($\frac{1}{2}$ " x $\frac{3}{4}$ "), ($\frac{1}{4}$ " x $\frac{3}{8}$ "), ($\frac{1}{2}$ " x $\frac{3}{4}$ "),
($\frac{1}{2}$ " through 2") ($\frac{1}{2}$ " through 2")

Universal Bolt Dies: (Right Hand only) NC (USS), or NF (SAE) $\frac{1}{4}$ ", $\frac{5}{16}$ ", $\frac{3}{8}$ ", $\frac{7}{16}$ ", $\frac{1}{2}$ ", $\frac{9}{16}$ ", $\frac{5}{8}$ ", $\frac{3}{4}$ ", $\frac{7}{8}$ ", 1", $1\frac{1}{8}$ ", $1\frac{1}{4}$ ", $1\frac{3}{8}$ ", $1\frac{1}{2}$ ".

Universal Right Hand Bolt Dies: NC (USS) only $1\frac{3}{4}$ " and 2".

No. 515 Die Head

$\frac{1}{8}$ " through $\frac{3}{4}$ " Pipe

No. 515 Die Head, Less Dies $8\frac{1}{4}$ lbs.

Dies For No. 515 Head — Right Hand Only:

| | |
|-------------------------|--|
| No. 551 Pipe Dies | $\frac{1}{8}$ " Right Hand |
| No. 552 Pipe Dies | $\frac{1}{4}$ " x $\frac{3}{8}$ " Right Hand |
| No. 554 Pipe Dies | $\frac{1}{2}$ " x $\frac{3}{4}$ " Right Hand |

Note: $1\frac{1}{4}$ " x $3\frac{1}{8}$ " dual pipe dies available for discontinued Dual Die Head. #554 Dies fit discontinued $1\frac{1}{2}$ " x $3\frac{1}{4}$ " Dual Die Head.

No. 514 Left Hand Die Head $\frac{1}{8}$ " through $\frac{3}{4}$ "

No. 514 Left Hand Die Head, less Dies Wt. $8\frac{1}{4}$ lbs.

Dies For No. 514 Head — Left Hand Only:

| | |
|-------------------------|---|
| No. 514 Pipe Dies | $\frac{1}{8}$ " Left Hand |
| No. 514 Pipe Dies | $\frac{1}{4}$ " x $\frac{3}{8}$ " Left Hand |
| No. 514 Pipe Dies | $\frac{1}{2}$ " x $\frac{3}{4}$ " Left Hand |

Mono Die Heads

Mono Die Heads, less Dies—9 sizes, $\frac{1}{8}$ " through 2", Right Hand. Separate Die Head for each size wt. $8\frac{1}{4}$ lbs.
(Left Hand Mono Heads Available)

Dies For Mono Heads Only (Specify Size):

| |
|--|
| $\frac{1}{2}$ ", $\frac{3}{4}$ ", $\frac{1}{4}$ ", $\frac{3}{8}$ ", $\frac{1}{2}$ ", $\frac{3}{4}$ ", 1", $1\frac{1}{4}$ ", $1\frac{1}{2}$ ", 2" |
| Mono Pipe Dies, Right Hand (use right hand head) |

$\frac{1}{2}$ ", $\frac{3}{4}$ ", $1\frac{1}{4}$ ", $1\frac{1}{2}$ ", 2" Left Hand Mono Die Heads
and Dies Available on request.

500-B Bolt Die Heads

500-B — Capacity $\frac{1}{4}$ " through 1"
Wt. $7\frac{1}{2}$ lbs.

500-B — Capacity $1\frac{1}{8}$ " through 2"
Wt. 9 lbs.

Above heads take both right-hand and left-hand 500-B bolt dies.

Bolt Dies:

500-B Right-Hand Bolt Dies (Alloy or High Speed), NC (USS) or NF (SAE)—
Sizes: $\frac{1}{4}$ ", $\frac{5}{16}$ ", $\frac{3}{8}$ ", $\frac{7}{16}$ ", $\frac{1}{2}$ ", $\frac{9}{16}$ ", $\frac{5}{8}$ ", $\frac{3}{4}$ ", $\frac{7}{8}$ ", 1", $1\frac{1}{8}$ ", $1\frac{1}{4}$ ", $1\frac{3}{8}$ " and $1\frac{1}{2}$ ".

$1\frac{3}{4}$ " and 2" NC(USS) Only

500-B Left Hand Bolt Dies (Alloy or High Speed) — All sizes as above.
 $1\frac{5}{8}$ " — $5\frac{1}{2}$ T.P.I. and $1\frac{7}{8}$ " — 5 T.P.I. (Right hand only)

American National Series (High Speed)

8 T.P.I. $1\frac{1}{8}$ " through $2\frac{1}{2}$ "

12 T.P.I. $\frac{1}{2}$ " through $2\frac{1}{2}$ "

16 T.P.I. $1\frac{1}{16}$ " through $2\frac{1}{2}$ "

General Purpose Acme and Metric Dies for RIDGID
500-B Bolt Die Heads Available on Request.

Beveling Dies

For beveling pipe ends prior to welding, 1" through 2". Beveling Dies fit Universal or Quadri Die Head. $\frac{1}{2}$ " & $\frac{3}{4}$ " Beveling Dies fit No. 515 or $\frac{1}{2}$ " & $\frac{3}{4}$ " Dual Head. Furnished in sets of four segments — 1 cutting segment and 3 guide segments.

37½° Beveling Dies

$\frac{1}{2}$ " x $\frac{3}{4}$ " or 1" through 2"

45° Beveling Dies

$\frac{1}{2}$ " x $\frac{3}{4}$ " or 1" through 2"

Special Beveling Dies on request

Grooving Dies

To groove pipe for Victaulic Type Couplings. Use with Universal or Quadri Die Head.

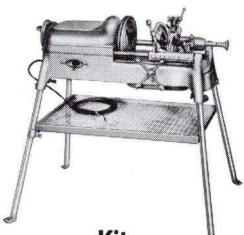

Grooving Dies

1" through 2" only

NOTE: Replacement Dies — Type and Size of Die Head must be specified on order. Special Dies — Information and Prices on request.

RIDGID No. 19 Nipple Chuck**For Threading
Close Nipples**

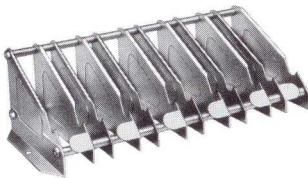

No. 19 Nipple Chuck is an easy-to-use, time-saving tool that holds short and close nipples or studs for threading. It's designed

for use with Pipe and Bolt Threading Machines and RIDGID 300 or new style 200 Power Drives equipped with No. 311 Carriage and Quick-Opening Die Heads. Adaptors are for $\frac{1}{8}$ ", $\frac{1}{4}$ ", $\frac{3}{8}$ ", $\frac{1}{2}$ ", $\frac{3}{4}$ ", 1", $1\frac{1}{4}$ ", $1\frac{1}{2}$ " nipples. Nipple Chuck itself holds 2" Pipe — no Adaptor needed. Stud adaptors also available. Designed for Right Hand only. (Above available for British Thread).

| Description | Wt. lbs. |
|--|---------------|
| No. 19 Nipple Chuck, $\frac{1}{2}$ " through 2" with 5 Adaptors, Patented Carrier and Wrench | 11 |
| Pipe Adaptors: $\frac{1}{8}$ ", $\frac{1}{4}$ ", $\frac{3}{8}$ ", $\frac{1}{2}$ ", $\frac{3}{4}$ ", 1", $1\frac{1}{4}$ ", $1\frac{1}{2}$ " | $\frac{1}{2}$ |
| Stud Adaptors, $\frac{1}{4}$ " through 2" NC and $\frac{1}{4}$ " through $1\frac{1}{2}$ " NF | $\frac{1}{2}$ |
| Nipple Chuck Wrench to release Nipples and tighten Adaptors | 1 |

RIDGID Die Head Racks**(2 Models)****For All Machine Die Heads**

Rugged steel racks have individual compartments for easy die head selection.

| | 4-Head Rack | Wt. lbs. |
|--------|--|----------|
| No. 4U | 4 Compartments for Pipe and Bolt Die Heads | 8½ |
| No. 6U | 6 Compartments for Pipe and Bolt Die Heads | 12½ |

RIDGID Thread Cutting Oils**Protect Your Dies . . . Get Better Threads**

A good thread cutting oil must cool, speed metal removal, produce a smooth finish and prevent chips from welding to your dies. No oil — in its pure state — will perform all these functions. Therefore, RIDGID super quality, sulphur-lard thread cutting oils, are not just one oil but an exactly formulated blend of oils for easier, faster threading. Highest quality petroleum oil is used as the cooling agent and carrying base. A fatty oil acts as wetting agent for maximum lubrication. Pure flowers of sulphur help form a film between tool and metal for reduced frictional wear. Anti-foam agent keeps oil clear in spite of agitation. Odorless germicide eliminates danger of infection or irritation. Tests prove the superiority of RIDGID Thread Cutting Oils for drilling, turning and other metal cutting operations. You may want some for your lathe or drill press, too. They should not be used as a lubricant. Take your choice of Dark or Nu-Clear — you get the same top-quality thread cutting performance. **Also satisfactory for threading stainless steel.**

| Size Container | Cans to Case | Wt. lbs. Case |
|----------------------------|--------------|---------------|
| 1 pt. can (Nu-Clear only) | 24 | 32 |
| 1 qt. can | 12 | 28 |
| 1 gal. can | 6 | 51½ |
| 2 gal. can (Nu-Clear only) | 3 | 50 |
| 5 gal. can | 1 | 42 |
| 30 gal. drum | 1 | 252 |

F.O.B. Elyria, Ohio — No Freight Allowed

Lubricating Grease (For Large Gear) 4 oz. Tube
Gearhead Motor Grease 1 lb. can

RIDGID**Adjustable Pipe Supports****Handle Up to 10" Pipe**

Designed for RIDGID Close-Coupled Drive Method (see Page 17). Right-angle rollers let pipe turn freely. Heavy-duty construction. Height is adjustable from 23" to 33".

Wt. lbs.

RIDGID No. 46 23

No.
46

No.
92

Large rollers let pipe move forward freely. Rugged construction, supports pipe without tipping or rocking. Height adjust from 32" to 41".

Wt. lbs.

RIDGID No. 92 28½

RIDGID**No. 318
Oiler****Stops Oil Waste, Keeps Dies Flooded
For Perfect Threads, Lengthens Die Life**

Hand operated, continuous oiler pumps easily by thumb action. Large chip pan catches oil run-off, chips and scraps. No messy floors. Oil is double-screened and re-circulated through reservoir, hose and hand pump. Completely portable. Quickly pays for itself in oil savings alone. Chip pan is 14½" in diameter, 8½" high. Hose length, 48".

RIDGID No. 318 Oiler, complete with Wt. lbs.
2 gallons of Thread Cutting Oil. 30

**RIDGID****No. 302 Utility Oiler**

Same easy-action hand pump as on RIDGID No. 318 Oiler. Pumps oil fast as you want it. Screw Cap fits any 1, 2 or 5-gal. can. (Note: This can be used as industrial oiler. Special spout available).

Wt. lbs.

RIDGID No. 302 Utility Oiler 2 ¾
(Oil Not Included)

RIDGID Universal Drive Shaft

Telescoping drive shaft is designed for use with all Threading Machines and Power Drives in conjunction with geared pipe tools such as RIDGID 4PJ, 141 and 161 Geared Threaders. Drive Shaft shank engages machine chuck. Flexible coupling attaches to drive pinion of geared tool. Shaft length can be extended from 41" to 50". (Fits all types of geared threaders and cutters.)

Wt. lbs.

Universal Drive Shaft 26

To Remove Broken Threaded Ends
of Pipe, Screws, Studs, Bolts

RIDGID Pipe Extractors

For extracting broken threaded ends of pipe, pipe plugs, fittings, etc. Each extractor is plainly marked showing drill size to use when solid ends of plugs, fittings, etc., must be drilled to receive extractor.

Pipe Extractor Sets:

| Set No. | | |
|---------|---|---------------------|
| 880 | $\frac{1}{8}$ " through $\frac{1}{2}$ " | Nos. 80 to 83 incl. |
| 881 | $\frac{1}{4}$ " through $\frac{3}{4}$ " | Nos. 81 to 84 incl. |
| 882 | $\frac{1}{4}$ " through 1" | Nos. 81 to 85 incl. |
| 883 | $\frac{1}{8}$ " through 1" | Nos. 80 to 85 incl. |

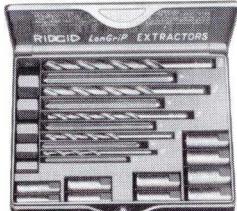

Single Pipe Extractors:

| No. | Pipe Size | Length Overall | Use Drill |
|--------|------------------|-------------------|--------------------|
| No. 80 | $\frac{1}{8}$ " | 2 $\frac{1}{4}$ " | $\frac{1}{4}$ " |
| No. 81 | $\frac{1}{4}$ " | 2 $\frac{1}{2}$ " | $\frac{3}{8}$ " |
| No. 82 | $\frac{3}{8}$ " | 2 $\frac{3}{4}$ " | $\frac{1}{2}$ " |
| No. 83 | $\frac{1}{2}$ " | 3" | $\frac{5}{8}$ " |
| No. 84 | $\frac{3}{4}$ " | 3 $\frac{1}{4}$ " | $1\frac{13}{16}$ " |

| No. 87 | $1\frac{1}{2}$ " | 4" | $1\frac{1}{16}$ " |
| No. 89 | 2" | 4 $\frac{1}{2}$ " | $2\frac{1}{16}$ " |

Pipe Extractors for extra strong wall pipe available, Nos. 83E to 89E incl.

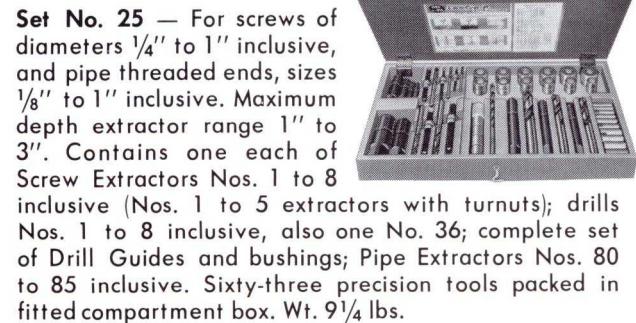

Standard Length Sets with Drill Guides and H.S. Drills:

RIDGID Screw Extractor Set

Set No. 10 — For screws of diameters $\frac{1}{4}$ " to $\frac{1}{2}$ " inclusive. Maximum depth extractions one inch. Contains one each of Extractors Nos. 1 to 5 inclusive, with turnuts. Drills Nos. 1 to 5 inclusive. Drill Guides Nos. 921 to 1821 inclusive. Twenty precision tools. Packed in a preformed, non-breakable box. Wt. $1\frac{1}{4}$ lbs.

RIDGID Screw and Pipe Extractor Set

Set No. 25 — For screws of diameters $\frac{1}{4}$ " to 1" inclusive, and pipe threaded ends, sizes $\frac{1}{8}$ " to 1" inclusive. Maximum depth extractor range 1" to 3". Contains one each of Screw Extractors Nos. 1 to 8 inclusive (Nos. 1 to 5 extractors with turnuts); drills Nos. 1 to 8 inclusive, also one No. 36; complete set of Drill Guides and bushings; Pipe Extractors Nos. 80 to 85 inclusive. Sixty-three precision tools packed in fitted compartment box. Wt. $9\frac{1}{4}$ lbs.

RIDGID Screw Extractors

RIDGID No. 105 Tubing Cutter

Grooved Rolls for Close Flare Cut-offs

Fold-in Reamer
Protects Hands
and Pockets

Spare Cutter Wheel
in Handle

Only 5" Long, Open or Closed!

Enclosed feed can't clog or jam. Frame of lightweight, high-strength aluminum alloy. Cuts copper, brass, aluminum tubing and thin-wall conduit. Rollers smooth tubing ready for soldering.

No. 105 — Capacity $\frac{1}{8}$ " through $1\frac{1}{8}$ " O.D. Wt. $\frac{1}{2}$ lb.

RIDGID No. 205 Tubing Cutter

Spare Cutter
Wheel in Handle

Has instant slide-action size adjustment. Slightest push on handle snugs cutter wheel against tubing where it locks until released. Grooved rollers for close-to-flare cuts often eliminate tubing replacement. Tubing always turns on 2 of 4 rollers for easy operation.

No. 205 — Capacity $\frac{1}{4}$ " through $2\frac{3}{8}$ " O.D. Wt. $1\frac{3}{4}$ lbs.

RIDGID Tubing Cutters

For Copper, Brass, Aluminum and Thin-Wall Conduit

No. 10 Capacity $\frac{1}{8}$ " through 1 "
No. 15 Capacity $\frac{3}{16}$ " through $1\frac{1}{8}$ "
No. 20 Capacity $\frac{5}{8}$ " through $2\frac{1}{8}$ "

No. 30 Capacity 1 " through 3 "
No. 40 Capacity 2 " through 4 "
(For Large Tubing)

Fold-in Reamer Protects
Hands and Pockets

No. 315 — 3-Wheel, Capacity $\frac{3}{16}$ " through $1\frac{1}{8}$ "
(Not Illustrated)

Special Wheels For Cutting Plastic (PVC) Tubing:

| Cutter | Wheel No. | Max. Capacity |
|----------------|-----------|------------------|
| No. 205 | E-5272 | 2 " |
| No. 30 | E-5299 | $2\frac{1}{2}$ " |
| No. 40 | E-5299 | $3\frac{1}{2}$ " |

Standard and Heavy-Duty replacement cutter wheels for RIDGID Tubing Cutters available. See Price List for further details. Special wheels for aluminum tubing also available.

RIDGID Flaring Tools

One Integral
Unit . . . Parts
can't get lost

These advanced-design RIDGID Flaring Tools give absolutely smooth, uniform flares every time . . . faster, too . . . with minimum effort, even on large sizes. Large, comfort-grip feed screw handle turns easily. Precision-ground hardened steel flaring cone, eccentrically mounted in precision bearings, produces rolling action for even metal flow . . . gives uniform flare walls without galling. Flare can then be ironed by continued cone action. Heat treated flaring bars are precision-ground. Tubing hole sizes are clearly marked. Rugged yokes slide to desired size. Yoke clamp screw fits into centering hole . . . locks bars, yoke and tubing into perfect alignment. Stop pins keep yoke on flaring bars at all times . . . Yoke can't slide off.

All Flaring Tools listed immediately below are recommended for soft materials such as aluminum and soft copper. No. 454-W, No. 455 and No. 375 will also flare steel, stainless steel, hard copper and brass.

Wt. lbs.

| | |
|--|----------------|
| No. 457 for 45° S.A.E. flares, $\frac{1}{8}$ " through $\frac{5}{8}$ " O.D. (7 sizes) | $3\frac{1}{4}$ |
| No. 459 for 45° S.A.E. flares, $\frac{1}{8}$ " through $\frac{3}{4}$ " O.D. (9 sizes) | $3\frac{1}{2}$ |
| No. 376 for 37° S.A.E. flares, $\frac{5}{16}$ " through $\frac{5}{8}$ " O.D. (6 sizes) | $3\frac{1}{4}$ |
| No. 454-W for 45° flares, $\frac{3}{8}$ " through 1 " N.W.* (4 sizes) | $6\frac{1}{4}$ |
| No. 455 for 45° S.A.E. flares, $\frac{1}{2}$ " through 1 " O.D. (5 sizes) | $6\frac{3}{4}$ |
| No. 375 for 37° S.A.E. flares, $\frac{1}{2}$ " through 1 " O.D. (5 sizes) | $6\frac{3}{4}$ |

* Nominal Water Tube

RIDGID Hammer-Type Flaring Tools**8 Sizes for all $\frac{3}{8}$ " through 2" Water Tube**

Made of high-grade hardened steel, these tools have a long nose guide that centers tool for perfect, crack-free flares every time. Lightweight hollow construction allows full impact of each hammer blow to be transmitted to the tube . . . far less blows are needed. Easy-to-hold, knurled head and flaring flange give tight one-hand gripping surface. Hardened anvil will not "mushroom" in use. Positive diameter stop eliminates over or undersize flares . . . assures tight seal with fitting. Nose guide smooths out any distorted tube.

Pre-Tested Work Saver Tools

RIDGID Lever-Type Tube Benders

Six Sizes from $\frac{3}{16}$ " through $\frac{1}{2}$ " O.D.
Fast, Accurate Bends of Soft and Hard Copper, Brass, Aluminum, Steel and Stainless Steel Tube

Improved design of these RIDGID Lever-Type Benders makes them versatile, accurate and easy to use. When tube is correctly measured, bends will be accurate to blueprint dimensions within $\pm 1/32$ ". All wearing surfaces have been hardened for lasting accuracy, long service.

Spring washers hold link and shoe handle in any desired position for easy insertion and removal of tube.
 Scale on inner face of link eliminates extra measuring, assures fast tube positioning for accurate finished dimensions.
 Cam-shaped latch with thumb boss assures positive but easy latching and unlatching. Held by spring washer, latch stays out of way for easy tube insertion.
 Forming head is clearly marked for angle of bend in $22\frac{1}{2}$ ° increments from 0° to 180° .
 Form handle is grooved for positive tube alignment. Form handle and tube can be secured in a vise when bending extra hard tube.
 Form handle carries "Gain Marks" for accurate measurement of tube before cutting. Pieces can be pre-cut to proper length . . . no extra cutting or wasted material.
 Extra strong, one-piece handle and forming head assure lasting accuracy. Stop pin assures proper link position for start of bend.
 Unique offset position of pivots eliminates pinching of tube at start of bend.
 Handles are still wide apart when completing a full 180° bend . . . no knuckle cracking.

| Model No. | Tubing Size | Radius to Center of Tube | Wt. lbs. |

RIDGID Spring-Type Tube Benders

Eight Sizes for $\frac{1}{4}$ " through $\frac{7}{8}$ " O.D.

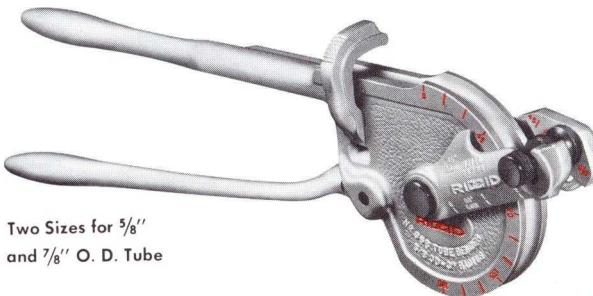

For fast, safe, free-form bending of soft copper and aluminum tube, RIDGID Spring-Type Benders meet all government specifications. Coil springs fit tube snugly . . . prevent deformation at point of bend. For shorter radius bends on small diameter tube, bender wire is proportioned to tube size. Plated springs stay new looking for years.

| Bender No. | Tube O.D. | Length | Bender No. | Tube O.D. | Length |
|------------|------------------|--------|------------|-----------------|--------|
| D-1375 | $\frac{1}{4}$ " | 10" | D-1379 | $\frac{1}{2}$ " | 12" |
| D-1376 | $\frac{5}{16}$ " | 10" | D-1380 | $\frac{5}{8}$ " | 12" |

| D-1378 | $\frac{7}{16}$ " | 12" | D-1382 | $\frac{7}{8}$ " | 12" |

Available singly or in sets:

Set No. E-5732 (set of 6) $\frac{1}{4}$ " - $\frac{5}{8}$ " Weight 1 $\frac{3}{4}$ lbs.
 Set No. E-5734 (set of 8) $\frac{1}{4}$ " - $\frac{7}{8}$ " Weight 3 lbs.

RIDGID Geared Ratchet Lever-Type Tube Benders

Two Sizes for $\frac{5}{8}$ " and $\frac{7}{8}$ " O. D. Tube

Geared High Mechanical Ratios Let You Bend:

Heavy-Wall Steel Tube (up to $\frac{1}{8}$ " wall thickness)

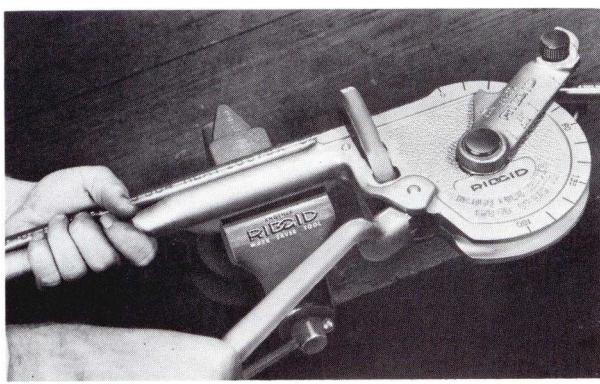

Stainless Steel Tube (up to $\frac{3}{32}$ " wall thickness) and

Hard Copper Water Tube (types K and L)

Made of high-strength aluminum for handling ease, these new RIDGID Ratchet Tube Benders will produce distortion-free bends up to 180° . Pre-heating of tube or the need of special temper grade tube have been eliminated.

Special, no-feed-thru design permits easy positioning of bender at any desired point on tube. After bend is formed, latch and drive arm on top of bender are swung back for easy disengagement of bender and tube. "Gain marks" on drive arm assure accurate pre-cutting of tube to length for time and material savings. Alignment marks on drive arm give bending accuracy.

Long ratchet handle and geared 13 to 1 (Model No. 358) and 18 to 1 (Model No. 378) mechanical ratios reduce bending effort to a minimum. Bending roller is free-turning to eliminate friction. Special clamping pad on bottom of form handle allows vise mounting when desired.

RIDGID No. 358 Ratchet Tube Bender, $\frac{5}{8}$ " O.D. Tube ($\frac{1}{2}$ " Nominal Water Tube) Capacity, 3" Radius to Center Line of Tube.....Weight 7 $\frac{1}{2}$ lbs.

RIDGID No. 378 Ratchet Tube Bender, $\frac{7}{8}$ " O.D. Tube ($\frac{3}{4}$ " Nominal Water Tube) Capacity, 3 $\frac{3}{4}$ " Radius to Center Line of Tube.....Weight 13 $\frac{1}{2}$ lbs.

RIDGID Power Benders

The Only Portable, Electrically Operated Benders
That Produce Up to 6 Accurate Bends Per Minute On

- $\frac{1}{2}$ ", $\frac{3}{4}$ " and 1" Rigid Conduit and EMT • $\frac{1}{2}$ ", $\frac{3}{4}$ " and 1" Pipe (Including Extra Heavy) •
- *All $\frac{1}{2}$ " through 1" Copper (types K & L) and Steel Tube • *Up to $\frac{7}{8}$ ", Round, Hex or Square Bar, 1 $\frac{1}{4}$ " EMT and 1 $\frac{1}{2}$ " Channel Stock.

*Information upon request for special shoes.

See a RIDGID Power Bender in operation and you'll know that it offers important savings through lower costs . . . better bends. Though it weighs slightly over 200 pounds it's easy to move on large, wide-track wheels. Setups for size, bend radius, angle of bend and type of material to be bent are quickly made . . . without tools. Virtually any type of bend can be accurately produced. Bend chart provides easy calculation of

RIDGID
No. 805 Power Bender

Speed: Up to 3 bends per minute.

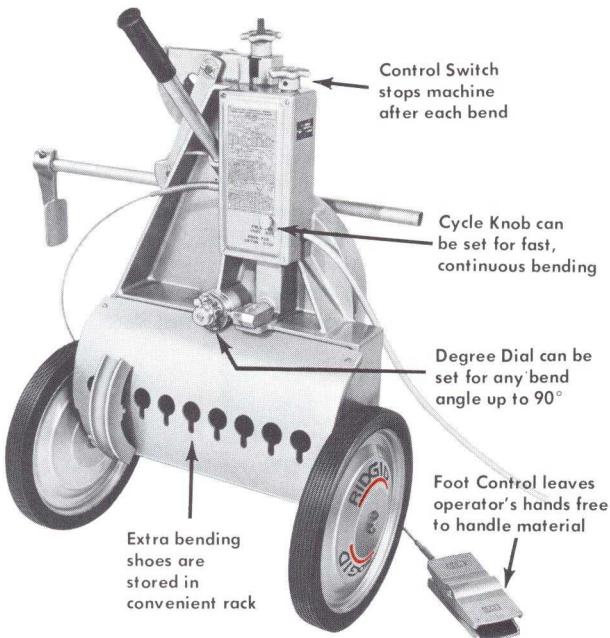

Capacity: $\frac{1}{2}$ ", $\frac{3}{4}$ ", and 1" Rigid Conduit and Pipe — (including Extra Heavy) with the 2 standard Bending Shoes furnished. Other Bending Shoes are available for $\frac{1}{2}$ ", $\frac{3}{4}$ ", 1", and 1 $\frac{1}{4}$ " EMT; $\frac{1}{2}$ " through 1" Copper (types K & L) and Steel Tube; up to $\frac{7}{8}$ " Round, Hex or Square Bar and 1 $\frac{1}{2}$ " Channel.

Weight: 225 $\frac{1}{2}$ pounds.

Standard Equipment: $\frac{3}{4}$ H.P. capacitor start, high torque induction motor; 30:1 gear reduction; Bend Degree Dial with microswitch; Length Gage Stop (Tube not furnished, use 1" EMT); 1 Forming Roll; 2 Bending Shoes with 5" radius ($\frac{1}{2}$ " and $\frac{3}{4}$ ") and (1") Rigid Conduit and Pipe.

doglegs, offsets, saddles and back to back bends . . . no expensive trial and error. Handy length gage saves time when making identical stub bends. When bending long lengths, where overhead height is limited, the Bender can be laid back and rested on its handle in a horizontal position.

See Catalog Sheet No. 64-D for Complete Details, Listing of Accessories and Extra Bending Shoes.

RIDGID No. 805-S (Speedy)
Power Bender

Speed: Up to 6 bends per minute.

Capacity: $\frac{1}{2}$ ", $\frac{3}{4}$ ", and 1" Rigid Conduit and Pipe (including Extra Heavy) with the 2 standard Bending Shoes furnished. Other Bending Shoes are available for $\frac{1}{2}$ ", $\frac{3}{4}$ ", 1", and 1 $\frac{1}{4}$ " EMT; $\frac{1}{2}$ " through 1" Copper (types K & L) and Steel Tube; up to $\frac{7}{8}$ " Round, Hex or Square Bar and 1 $\frac{1}{2}$ " Channel.

Weight: 235 pounds.

Standard Equipment: $\frac{3}{4}$ H.P. capacitor start, high torque induction motor; 30:1 gear reduction; Bend Degree Dial with microswitch; Foot Control for high speed production; Cycle Control Knob; Length Gage Stop (Tube not furnished, use 1" EMT); 1 Forming Roll; 2 Bending Shoes with 5" radius ($\frac{1}{2}$ " and $\frac{3}{4}$ ") and (1") Rigid Conduit and Pipe.

RIDGID Thin-Wall Conduit Benders

**3 Sizes for $\frac{1}{2}$ " through 1" Thin-Wall Conduit,
 $\frac{1}{2}$ " and $\frac{3}{4}$ " Heavy-Wall Conduit**

Cast of high-strength malleable, these RIDGID Conduit Benders have an exceptionally smooth typically RIDGID quality finish. Bending grooves conform to Standard Code Radii. Smooth side walls grip conduit snugly... minimize distortion. Non-slip step provides for steady- ing foot pressure. Easy-to-see arrows give accurate guide for back-to-back and stub bends. (Handles not included.)

Wt. lbs.
B-1677 Bends $\frac{1}{2}$ " Thin-Wall Conduit to 4" Inside Radius 2 $\frac{1}{2}$
B-1678 Bends $\frac{3}{4}$ " Thin-Wall and $\frac{1}{2}$ " Heavy-Wall Conduit to 5" Inside Radius 4 $\frac{1}{2}$
B-1679 Bends 1" Thin-Wall and $\frac{3}{4}$ " Heavy-Wall Conduit to 6 $\frac{1}{2}$ " Inside Radius 8 $\frac{1}{2}$

**RIDGID Hickey-Type
 Heavy-Wall Conduit Benders**

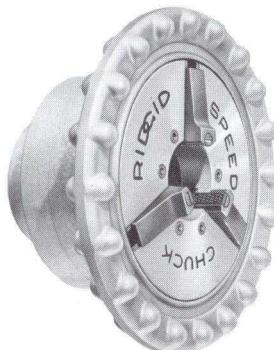

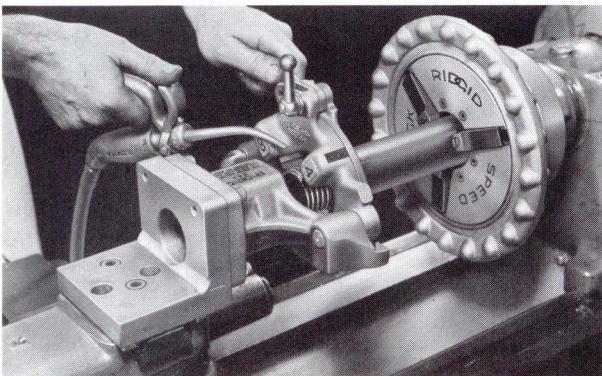

2 Sizes for $\frac{1}{2}$ " through 1 $\frac{1}{4}$ " Heavy-Wall Conduit

Handle threads are at bottom of extra-long supporting socket to minimize handle breakage. Face of bender has hardened teeth for non-slip grip. Notch in radius protects conduit threads. (Handles not included.)

Wt. lbs.

B-1711 Bends $\frac{1}{2}$ " and $\frac{3}{4}$ " Heavy-Wall Conduit 2 $\frac{3}{4}$
B-1712 Bends $\frac{3}{4}$ ", 1" and 1 $\frac{1}{4}$ " Heavy-Wall Conduit 7 $\frac{3}{4}$

**RIDGID Attachments Convert
 Any Lathe or Drill Press into a
 Threading Machine for $\frac{1}{8}$ " through
 2" Pipe, $\frac{1}{4}$ " through 2" Rod**

RIDGID No. 963
Lathe
Speed Chuck

Wt. Lbs. 39 $\frac{1}{2}$

When fitted on lathe spindle, this fast-action, hand operated chuck saves valuable "set-up" time. Work can be chucked from front or rear, without completely stopping lathe. Rocker-action jaws grip tighter as more torque is applied, yet always release easily by hand. Chuck gives positive grip on any work up through 2 $\frac{3}{8}$ " diameter.

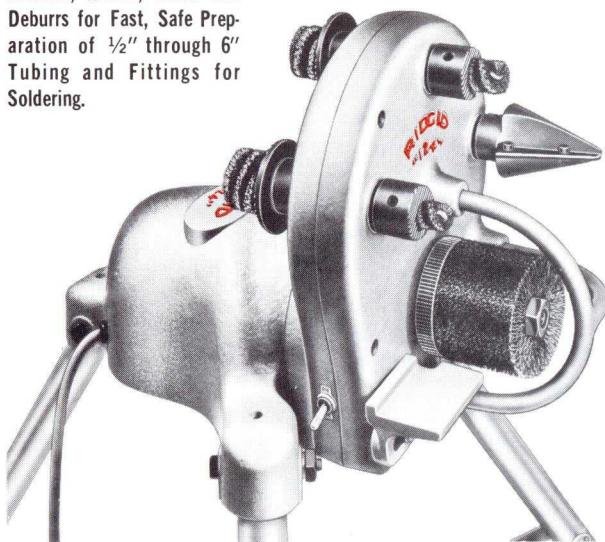

RIDGID No. 962
Die Head Adaptor

Wt. Lbs. 12

Rugged Die Head Adaptor holds any RIDGID Quick-Opening Machine Pipe or Bolt Die Head. Die Heads snap-lock quickly into Adaptor. Mounting pad is easily drilled for exact fit on lathe or drill press table.

RIDGID No. 124**Copper Cleaning Machine**

Brushes, Reams, Faces and Deburrers for Fast, Safe Preparation of $\frac{1}{2}$ " through 6" Tubing and Fittings for Soldering.

**Weighs Only 62 lbs. with Folding Tripod**

Here's a machine that gives real production line speeds. One man can prepare fittings while another prepares tube. All operations are performed at **safe speeds**. If fitting slips, it can be regrasped without stopping machine. External cleaning brush and deburring cutter rotate away from rest plate. Tube can't jam.

Facing cutters are mounted behind internal brushes. You save time by doing two operations at once. External deburring cutter, at rear of $3\frac{1}{4}$ " brush, removes burrs and bevels tube ends for easy fit into fittings while brush cleans tube surface. Five internal cleaning brushes can be mounted on machine. Remaining 4 brushes and Allen wrench are held in stand tray by rubber grommets.

Brushes rotate in one direction only. Minimum flexing extends brush life. Six of the brushes and the 5 facing cutters are interchangeable. Cutter wear can be distributed over a broad surface. Replaceable reamer blade is made of hardened tool steel. Sturdy tripod gives a rigid work base, even on uneven ground. Legs fold and chain-lock for easy carrying.

STANDARD EQUIPMENT: Motor — Heavy-duty, induction type available in 115 or 230 volts — 50/60 cycles — AC, single phase only with 15-ft. oil resistant cord. 9 Internal Cleaning Brushes — heavy-duty wire for $\frac{1}{2}$ ", $\frac{3}{4}$ ", 1", $1\frac{1}{4}$ ", $1\frac{1}{2}$ ", 2", $2\frac{1}{2}$ ", 3" and 4" fittings. Five Facing Cutters — hardened steel for $\frac{1}{2}$ " through 2" fittings. External Cleaning Brush and Deburring Cutter for $\frac{1}{2}$ " through 4" tube. Reamer — cone shaped with replaceable blade for $\frac{1}{2}$ " through 2" tube. Allen Wrench used to change brushes and facing cutters.

RIDGID No. 126**Facing Cutter****4" Capacity**

This accessory facing cutter speeds preparation of all $\frac{3}{4}$ " through 4" fittings.

Cast disc holds hardened steel insert that faces fitting ends. Cutter is securely fastened on fitting brush arbor by single set screw.

**RIDGID****No. 128 Reamer****4" Capacity**

This large capacity reamer has a single replaceable hardened steel blade that reams $2\frac{1}{2}$ " through 4" tube. Three roller design greatly reduces friction for fast, smoother reaming. Tube easily held by hand.

Fitting Brushes **$\frac{1}{4}$ " and $\frac{3}{8}$ "**

These two small internal cleaning brushes, primarily used for refrigeration and air conditioning, can be used with any of the standard facing cutters.

**8 Heavy-Duty Internal Cleaning Brushes for 1" through 4" Fittings**

Designed especially for users installing large quantities of pressure or DWV fittings. Offer **faster cleaning and 5 to 10 times longer brush life**. Construction is similar to heavy-duty industrial type hard steel wire brushes.

Sizes 1", $1\frac{1}{4}$ " and $1\frac{1}{2}$ " have integral arbors. Two undercuts on each arbor assure proper depth positioning in machine ... deep cleaning depth for pressure (water) pipe, shallow cleaning for DWV.

Sizes 2", $2\frac{1}{2}$ ", 3", $3\frac{1}{2}$ " and 4" must be used with No. E-6128 Arbor. These sizes of heavy-duty brushes have hubs and are secured to the arbor with a set screw by using standard wrench furnished with RIDGID No. 124 Machine. Hub should face machine for pressure (water) fittings and outward for DWV fittings.

5" & 6" Heavy-Duty Internal Cleaning Brushes

These brushes are suitable for use on both pressure and DWV fittings. No. E-6212-X Arbor serves both sizes. Brushes are quickly secured to arbor by single hex bolt. Arbor is attached to machine spindle by set screw.

RIDGID**No. 1200****Hack****Saw****Non-adjustable ... for 12" Blade only**

Check these exclusive features that make this the world's most versatile hacksaw. Rugged steel and aluminum frame is only 16" long yet holds a 12" blade. Compactness gives fast, long blade cutting even in close quarters. Lever action gives greater blade tension for straighter cuts... longer blade life. 6 extra blades can be stored in backbone of frame... ready for instant use. When in normal vertical position, blade is fully supported in machined slots at each end of frame... blade can't twist but is flush with bottom of frame for fast cuts right down to surface. When mounted horizontally, blade gets full width support from bottom of frame... this is extra handy to cut off bolts, nails, etc. flush with surface.

RIDGID No. 1200 Hack Saw complete with one RIDGID No. 1224-A Standard Flexible Blade 1 1/4 lbs.

RIDGID Hack Saw Blades

Choice of Standard or High-Speed Blades in 10" or 12" Lengths

RIDGID Standard Flexible Hack Saw Blades:

These aluminum colored blades are especially designed for general use by plumbers, electricians, maintenance men, and home handymen. Teeth have been hardened. Blades are ideal for use on pipe, tubing, BX cable, wire-mold, sheet metal, low carbon grades of steel and non-ferrous material.

RIDGID High-Speed Flexible Hack Saw Blades:

These are extra rugged blades that can really take it and still stay sharp. Blades are made of molybdenum. Teeth have been hardened for lasting sharpness. Blade body retains maximum flexibility for fast sawing under adverse conditions.

| Standard Blade No. | Blade Size | To Inch | High-Speed Blade No. | Blade Size | To Inch |
|--------------------|-------------|---------|----------------------|-------------|---------|
| 1018-A | 10x1/2x.025 | 18 | 1018-HS | 10x1/2x.025 | 18 |
| 1024-A | 10x1/2x.025 | 24 | 1024-HS | 10x1/2x.025 | 24 |
| 1032-A | 10x1/2x.025 | 32 | 1032-HS | 10x1/2x.025 | 32 |
| 1218-A | 12x1/2x.025 | 18 | 1218-HS | 12x1/2x.025 | 18 |
| 1224-A | 12x1/2x.025 | 24 | 1224-HS | 12x1/2x.025 | 24 |
| 1232-A | 12x1/2x.025 | 32 | 1232-HS | 12x1/2x.025 | 32 |

Hack Saw Blades are sold in multiples of 50 only.

RIDGID**No. 1012****Hack****Saw****Adjustable for 10" and 12" Blades**

This rugged, adjustable hack saw is a real pleasure to work with. Front end and handle are diecast aluminum. They both give you a smooth, comfort grip. There are no bolts or rivets to come loose. Backbone of frame is steel tubing. Entire unit locks together solidly and is virtually untwistable. Front and rear blade stretchers are held in square holes. Blades stay straight... last longer. Adjustment for 10" and 12" blade lengths is fast and easy. Locking screw extends completely through assembly and at least 2 1/2" of backbone is engaged in handle for positive, solid alignment.

RIDGID No. 1012 Hack Saw complete with one RIDGID No. 1024-A Standard Flexible Blade 1 1/8 lbs.

RIDGID No. 1205 Compass Saw Handle

Here's a rugged, aluminum handle designed for easy use. It can't break, rust or chip. There's a natural grip for thumb and fingers of left hand as well as right for ease of 2-handed operation when needed. Square holes on both sides of handle hold square shank of bolt for easy, one-handed tightening or loosening of wing nut when changing blade. Blade can be reversed for sawing down to a surface.

RIDGID No. 1205 Compass Saw Handle, Chrome 1/2 lbs.
RIDGID No. 1204 Compass Saw Handle, Enameled 1/2 lbs.

RIDGID Compass Saw Blades

All RIDGID Compass Saw Blades offer the time-saving "Magic-Slot" for fast blade changing or reversing. Ends are pointed for ease of use in small holes.

2 Metal Cutting Blades

These carbon steel blades are fully hardened for maximum cutting life. Teeth are accurately milled and set.

| Number | Length | Teeth |
|--------|--------|-------|
| D-688 | 12" | 24 |
| D-689 | 12" | 10 |

Special Plywood Cutting Blade

Made of spring tempered steel, this blade's teeth have a special fleam angle to prevent tearing.

| Number | Length | Teeth |
|--------|--------|-------|
| D-692 | 12" | 12 |

4 Wood Cutting Blades

These heavy duty blades are designed for general trade use. Spring tempered steel assures exceptional toughness and hardness. Teeth are sharp, uniform and accurately set. Finish is polished and lacquered.

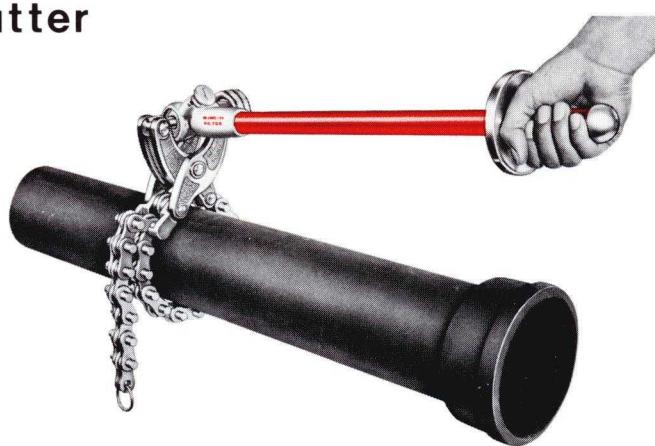

| Number | Length | Teeth | Number | Length | Teeth |
|--------|--------|-------|--------|--------|-------|
| D-690 | 8" | 8 | D-693 | 12" | 8 |
| D-691 | 10" | 8 | D-694 | 14" | 8 |

RIDGID Compass Saw Blades are sold in multiples of 10 only.

RIDGID No. 206 Soil Pipe Cutter

**Lightest, Most Compact, Most Powerful
In Its 2" Through 6" Size Range**

200 to 1 mechanical advantage gives this light (18 lbs.), compact cutter plenty of power to cut all 2" thru 6" clay, cast iron, asbestos, cement pipe and 4" water main. One man handles it easily in tightest quarters. Since ratchet action parallels pipe, pipe becomes second lever and helper as well. A few easy pumps of handle tighten chain until pipe is severed. Hand guard protects operator's knuckles at time of cut. Made of all alloy, heat-treated steel, all parts are plated or painted... will not corrode. Threaded parts are sealed to keep dirt and moisture out... lubrication in. Shipping weight 21 lbs.

RIDGID

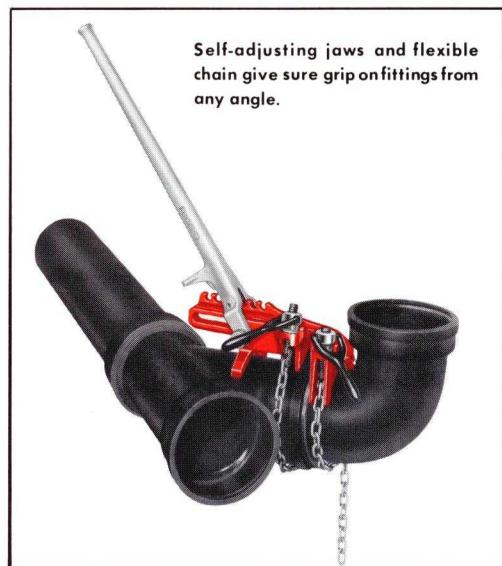

No. 228 Soil Pipe Assembly Tool

NEW ITEM

Here's the only assembly tool that handles all 2" through 8" gasketed soil pipe without extra, loose attachments. No parts to get lost or left behind. Self-adjusting jaws and flexible, kinkproof chains assure easy assembly of Y, tee and elbow fittings, as well as straight lengths.

Construction of RIDGID No. 228 Soil Pipe Assembly Tool resists clogging with tar and dirt even in wet, muddy conditions. Slim, compact design permits use in narrow trenches, in corners or on lines close together. Light weight and a high mechanical ratio let one man assemble even large sizes, fast and easily. Removal of aluminum handle facilitates vertical and overhead pipe assembly. When used on verti-

cal pipe, tool can be hung by its jaws on installed section. This leaves both hands free for fast tool attachment and positioning of next pipe length.

Tool centers pipe or fitting and guides it into hub. A few pulls on ratchet-action handle quickly complete assembly. If fitting is accidentally installed at wrong angle, disassembly can be made without any tool adjustment. Simply reverse handle action.

| No. | Capacity | Wt. Lbs. | Shipping Wt. Lbs. |

| No. 228 Soil Pipe Assembly Tool | 2" thru 8" | 20½ | 22½ |

Measuring Tapes and Folding Rules

All items are packaged in individual display holders

RIDGID**Automatic Locking Steel Tapes****Push-Button Gives Controlled Rewind**

Combination painted and chrome case has push-button for controlled rewind of tape. Tape automatically stops at desired position as tape is pulled out. Thumb latch gives positive locking when desired. Rugged belt clip is removable. White, steel tape has large, easy-to-read red and black figures that give measures in both feet and inches and consecutive inches. Color coded blocks clearly mark each foot and 16" centers. Special epoxy coating gives tape lasting protection. Back of 12' No. 632 tape gives direct readings for inside measures, as well as ten handy reference tables, such as screw, nail, lumber, pipe and tube sizes.

| Number | Width | Length | Weight lbs. 6 Per Box | Refill Number |
|--------|-------|--------|--------------------------|------------------|
| 621 | 1/2" | 10' | 3 1/8 | E-637 |
| 632 | 3/4" | 12' | 3 3/4 | E-640 |
| 636 | 3/4" | 16' | 3 1/2 | E-643 |

RIDGID**Manual 10' Steel Tape****Color Coded White Blade Gives 16" Centers**

Thin, lightweight case with bright chrome finish is small enough to carry in your pocket, or it can be secured on handy, removable belt clip. Replaceable tape, with self-adjusting end hook, has long-lasting epoxy finish. Top, red figures give measures in feet and inches. Bottom, black figures give measures in inches. Color blocks signal each foot and 16" centers. Bottom edge of first foot of tape is graduated in 32nds. Rest of tape gives measures to nearest 16th.

| Number | Width | Length | Weight lbs. 6 Per Box | Refill Number |
|--------|-------|--------|--------------------------|------------------|
| 617 | 1/2" | 10' | 1 3/4 | E-637 |

RIDGID**General Purpose Steel Tapes****3/8" Tape Marked One Side Only—
Hook Ring**

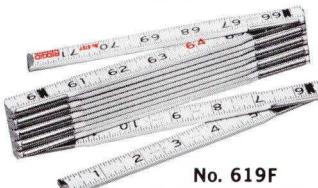

Durable case has vinyl covering over rust-resistant coated steel liner. All fittings are nickel plated. Fold-in-rewind handle is opened easily by push pin. Easy-to-read white steel tape shows inches in black, feet in red. 16" centers are clearly indicated. Replaceable mar-resistant tapes have triple baked finish on bonderized steel. Smooth surface is easy to clean. Folding end hook holds firmly yet is easily released.

| Number | Width | Length | Weight lbs. Each | Refill Number |
|--------|-------|--------|---------------------|------------------|
| 650 | 3/8" | 50' | 1 1/16 | E-645 |
| 655 | 3/8" | 100' | 1 13/16 | E-647 |

**RIDGID****Heavy Duty 6' Extension Rule**

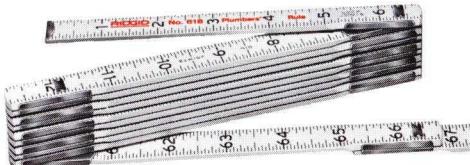

Graduated 6" brass slide, that is fitted into one section, gives accurate inside measurements. Bold, black figures give measurements in inches to the nearest 16th. Red figures indicate 16" centers. All markings are embedded in the wood. Rule has a durable, clear epoxy coating. Extra long heavy brass spring joints triple lock to prevent end play. Solid brass end caps are flush inset and are graduated. Made of extra sturdy straight grained hardwood, one-third heavier than regular folding rules. These rules are rugged yet flexible.

| Number | Width | Length | Weight lbs. 6 Per Box |
|--------|-------|--------|--------------------------|
| 620 | 5/8" | 6' | 2 1/4 |

RIDGID**Regular 6' Folding Rules**No. 619
Outside ReadingNo. 619F
Inside Flat Reading

Made of the finest hardwood, these flexible but strong rules have a white enamel finish with bold, black horizontal figures and 1/16" graduations on both edges of both sides. 16" centers have bold red markings. Finish is protected by a durable epoxy coating. Solid brass, concealed lock-joints, at each 6" fold, prevent end-play for measuring accuracy. Brass strike plates and end caps resist wear.

| Number | Width | Length | Weight lbs. 6 Per Box |
|--------------|-------|--------|--------------------------|
| 619 and 619F | 5/8" | 6' | 1 3/4 |

RIDGID**6' Plumbers' and Steamfitters' Rule**

Large, vertical, black figures on one side of this rugged white enamel rule indicate inches to the nearest 1/16 inch. On the reverse side, horizontal, red figures give the corresponding 45° scale, inches to 16ths. You get fast, accurate 45° elbow measurements. Rule has brass end caps and strike plates and tough epoxy coating for long wear. Concealed lock-joints prevent end-play even when rule is fully extended.

| Number | Width | Length | Weight lbs. 6 Per Box |
|--------|-------|--------|--------------------------|
| 618 | 5/8" | 6' | 1 3/4 |

RIDGID

Pre-Tested Work Saver Tools

Guarantee

Every RIDGID Work Saver Tool is individually tested before shipment. You are assured of dependable accuracy, long service life.

All RIDGID Machines, Power Drives and Hand Tools are fully guaranteed against defects in workmanship and material. Claims cannot be allowed until questioned material has been received and inspected at the factory.

Federal Specifications Covering RIDGID Work Saver Tools

RIDGID Wrenches comply with Federal Specifications GGG-W-651-d:

RIDGID Heavy-Duty Pipe Wrenches; Type II, Class A, Fig. 3.

RIDGID End Wrenches; Type VI, Class A, Fig. 8.

RIDGID Improved Stillson Wrenches; Type I, Normal Duty, Class A, Fig. 1.

RIDGID Strap Wrenches; Type V, Fig. 7.

RIDGID Adjustable Wrenches comply with Federal Specifications GGG-W-631-b:

Type I, Class 1, Fig. 1.

RIDGID Spud Wrenches comply with Federal Specifications GGG-W-631-b:

Type III, Monkey Wrench, Fig. A.

RIDGID Ratchet Pipe Reamers, Straight or Spiral comply with Federal Specifications GGG-180-a:

Type VII, Class 1, Fig. 19.

RIDGID Pipe Threaders comply with Federal Specifications GGG-T-581-b:

RIDGID 65 Series, 1" to 2", Self-Contained Threaders; Type III, Class 5, Fig. 10.

RIDGID Poster Threaders, 1" to 2"; Type III, Class 4, Fig. 9.

RIDGID Nos. 00-R, 111-R, 0-R, 11-R, 12-R Ratchet Threaders; Type III, Class 1, Fig. 5.

RIDGID Nos. 30-A, 31-A, 3-Way Threaders; Type III, Class 2, Fig. 6.

RIDGID Geared Threaders: 4PJ and No. 141, Type III, Class 6, Size A, Fig. 11.

RIDGID Pipe Cutters and Tube Cutters comply with Federal Specifications GGG-C-771-b:

RIDGID Pipe Cutters; Type I, Class 1, Style A and B, Fig. 1.

RIDGID Tube Cutters; Nos. 10, 15 and 20; Type II, Class 2, Fig. 6.

RIDGID Tube Cutters; Nos. 105 and 205; Type II, Class 1, Fig. 5.

RIDGID Tubing Benders comply with Federal Specifications GGG-B-191-a:

RIDGID Lever-Type; Type III, Class 2, Fig. 5b; Lever Actuated, Single Size.

RIDGID Spring-Type; Type IV, Table VI, Fig. 6.

RIDGID Bench Vises comply with Federal Specifications GGG-V-00415:

RIDGID Chain Vises; Type I, Class 1, Fig. 1.

RIDGID Yoke Vises; Type I, Class 2, Fig. 2.

RIDGID Thin-Wall Conduit Benders comply with Federal Specifications GGG-B-175:

Type II, Fig. 2. RIDGID No. B1677, B1678, B1679.

RIDGID Hickey-Type Heavy Wall Conduit Benders comply with Federal Specifications GGG-B-175

Type I, Fig. 1. RIDGID B1711, B1712.

RIDGID Extractors comply with Federal Specifications GGG-E-00936:

RIDGID Screw Extractors; Type I, Class 3, Style A, Fig. 4.

RIDGID Pipe Extractors; Type I, Class 3, Style B, Fig. 5.

RIDGID Pipe and Bolt Threading Machines comply with Federal Specifications OO-T-290:

RIDGID 500, and 535 Machines, Type I, Class 1 or 2, Style A, Fig. 1.

RIDGID Taper Pipe Taps, Carbon Steel, comply with Federal Specifications GGG-80; Type I.
